

LEADING THE FUTURE OF
LIGHTING + TECHNOLOGY

Energy Management Collaborative Nears Historic Milestone

25 Billion kWh Savings

Tracked for more than a decade, the saving reflects customers' energy savings and sustainability achievements.

Substantial Environment Benefits

- Avoiding over **16.8 million** metric tons of CO₂ emissions.
- Reducing greenhouse gas emissions equivalent to removing **3.9 million cars** from the road annually.
- Saving enough energy to close **4.4 coal-fired power plants** for an entire year.

Key Initiatives Leading to 25 Billion kWh

LED Lighting Innovation
Over 15 million LED fixture upgrades completed.

HVAC Efficiencies
Applying advanced building controls to reduce unnecessary energy usage and optimize comfort.

Smart Building Controls
Integrating advanced controls and IoT solutions.

Utility Collaboration
Maximizing energy efficiency rebates and incentives, significantly reducing upfront costs.
