

LEADING THE FUTURE OF  
**LIGHTING + TECHNOLOGY**

# EMC's HVAC Services

HVAC operation is responsible for up to 50% of your buildings' energy and can lose up to 25% of their efficiency in the first year.

The EMC suite of HVAC services keeps your facilities running at optimum performance and comfort.

## Rooftop Unit Sweeps

Replace aging equipment with traditional Rooftop Units (RTUs) or Heat Pumps.

Reclaim energy efficiency and cut costs with new equipment.

Explore the potential for significant heat pump incentives in MA, CT, NY, and CO.

## Heat Pump Install Case Study

### Project Scope

- Major Big Box Retailer
- 6 locations
- Average of 14 RTU replacements per site

### Financial Impact

- **50%** of total project costs were covered by incentives.

## UV-C Coil Cleaning Case Study

### Project Scope

- Major Big Box Retailer, Florida
- 60,000 sq-ft facility
- 12 RTUs

### Financial Impact

- **14%** annual HVAC energy savings: **86,000 kWh**

## UV-C Coil Cleaning

Keep HVAC equipment running at peak efficiency with always-on evaporator coil cleaning.

Recover **15%** or more of lost efficiency by eliminating mold and biofilm on RTU evaporator coils.
