

## LEADING THE FUTURE OF LIGHTING + TECHNOLOGY

### Grow Lighting

#### Maximize Speed and Harvest while Reducing Electric Load

Compared to outdoor farming, indoor horticultural lighting can increase production by as much as 350% and shorten growth cycles. Energy efficient LED lighting delivers the right light at the proper strength and best reach for indoor crop growth while offsetting the energy costs of traditional lamps by up to 50%.

EMC can help you develop a grow lighting solution or enhance your current operations to meet new goals and objectives. Our team offers:

- Audit/consultation services to help you identify priorities
- Design services with vendor-neutral approach to lighting technologies
- Turnkey implementation
- Controls integration
- Ongoing service support
